

ThinPrint leads the movement into a new era of print management

ThinPrint maintains its position as the market leader as IT infrastructures begin to “go virtual”

(San Francisco, CA, September 1st, 2009) [ThinPrint](#), the global, strategic [print](#) solution for centralized application delivery, today announced additional advancement in successfully managing [virtualized](#) print environments with the new release of the .print Desktop Engine. With the improved feature set of the [.print](#) Desktop Engine, administrators will be able to further their virtual desktop environments through support of ICA, TCP/IP and RDP protocols and the ability to easily deploy print servers for all virtual desktop systems including those using [VMware View](#).

- Optimal printing support for remote desktop access via RDP or in virtual desktop environments (VDI) with ICA and RDP
- Save time and administration by virtue of a simple plug and play installation and administration-free operation
- No need for server-side administration of printer drivers thanks to DRIVER FREE PRINTING
- Supports remote print servers, print appliances and printing to network printers

ThinPrint has experienced prior success in the virtual desktop market with embedded OEM technology licensed for VMware View™ and the .print Engine for VMware View™. The .print Engine for VMware View™ supports printing from thin clients and features centralized bandwidth management, which can further reduce management overhead. This creates an even more efficient solution for customers seeking to virtualize desktops.

“Printing is a continual issue even as companies begin to take their infrastructures virtual. Regardless of size and scope, ThinPrint is able to provide a complete printing solution for any IT environment. We’re excited to continue collaboration with industry leaders such as VMware and look forward to the next generation of technology” Charlotte Kuenzell, Senior Vice President at ThinPrint.

“As VMware looks forward to the industry transition into a virtual workspace, we are glad that partners such as ThinPrint are continually broadening the scope of possibilities while

maintaining a seamless experience for the end user,” said Raj Mallempati, director of product marketing, Desktop Business Unit, VMware.

ThinPrint will be presenting their print solutions at VMworld 2009 in San Francisco, CA Moscone Center August 31st – September 3rd, booth #2237.

The newest version of .print Desktop Engine is set to release early Fall 2009.

ThinPrint offers a multitude of products to complete all IT print environments. ThinPrint products are available for purchase through ThinPrint resellers. For sales information please contact ThinPrint at info@thinprint.com, visit www.thinprint.com/vmware or call 303-487-1302.

The press release is available as Doc and PDF file at www.thinprint.com/pressreleases.
