

ThinPrint .print technology now supports Citrix XenApp 6

The newly released Citrix XenApp 6 will be fully supported by ThinPrint .print product line

DENVER, Colorado (April, 2010) ThinPrint, manufacturer of the global, strategic print solution for centralized application delivery, today announced full support of Citrix XenApp(TM) 6 with their .print line of products.

With simplified management and increased scalability provided by XenApp 6, customers looking to fully support branch offices, home users and thin clients while reducing administration efforts and resources can now turn to ThinPrint. When utilizing ThinPrint .print products with XenApp, users see a drastic increase in flexibility and productivity thanks to a centralized print server.

Benefits include:

- Fully integrated with a Windows print system without adding a new infrastructure layer
- Single pane configuration, deployments and troubleshooting
- All drivers from XenApp are removed thanks to .print V-Layer™ technology, even if you use thin clients or would like to print directly to network printers
- Bandwidth control avoids network overload and increases bandwidth savings

"With the exciting new release of Citrix XenApp 6, ThinPrint will fully support XenApp 6 and the addition of Citrix Receiver, making it even easier for customers to integrate ThinPrint products. Simple and quick integration of a print server frees both clients and XenApp servers from printer drivers, drastically increasing flexibility and productivity while supporting the full range of printing features. We look forward to once again working with the Citrix team and the XenApp products to provide a great solution," says Henning Volkmer, President and CEO, ThinPrint Inc.

"We are glad to have our longtime partner ThinPrint support the new release of XenApp 6. With their advanced printing technology, we can meet the needs of our joint customers and deliver advanced scalability and performance for on-demand apps," said

Alicia Rey, director of product marketing for the XenApp product group at Citrix. "Citrix XenApp 6 offers major new enhancements that simplify computing for IT making it even easier for customers to deliver apps as an on-demand service to any user."
