

ThinPrint Optimizes Printing for Windows Server 2008 R2

ThinPrint's .print RDP Engine ensures fast, reliable printing results from remote access via RDP connections

(Berlin, September 7, 2010) ThinPrint, the cloud printing expert and market leader for software-based printing solutions in Microsoft Terminal Server environments, is releasing a version of its printing solution [.print RDP Engine](#) for Windows Server 2008 R2. The solution facilitates fast and reliable printing via RDP (Remote Desktop Protocol) connections. With the .print RDP Engine, local printers in home offices are seamlessly integrated into the company's IT. Additional features include the compression of print jobs down to 2 percent of the original size as well as automatic allocation of available printers for all employees. DRIVER FREE PRINTING developed by ThinPrint makes it possible to use "32-bit printers" in 64-bit networks.

Windows Server 2008 R2 features many improvements to remote access, which primarily improves interaction with Windows 7. It allows Windows 7-based clients to access the company network using Direct Access™ without VPN. BranchCache™ saves bandwidth and makes previously-cached content available more quickly.

Market leader ThinPrint's newest .print RDP Engine version improves the printing processes. The correct printer is always automatically made available to employees in their session over remote access, no matter if they are in a home office, a branch office, or at headquarters. The solution's print data compression ensures rapid printing results and efficient work even when accessing via ISDN or DSL. Another important feature is ThinPrint's DRIVER FREE PRINTING, which allows you to use 32-bit printers with the 64-bit Windows Server 2008 R2. This lowers operating expenditures and the administration effort.

The solution is plug-and-play and can be used in conjunction with Windows Server 2008, R2, Windows Small Business Server, Windows Server 2003 SP1 and Windows Server 2008 SP1. The solution is available from more than 500 ThinPrint Channel Partners worldwide. The price including update services is 820,00 Euro (32bit)/1.380,00 Euro (64bit).

.print RDP Engine is available as a free demo download at www.thinprint.com/demo.
