

ThinPrint previews cloud printing support for Citrix Receiver for iPad

Latest ThinPrint technology enables iPad printing for Citrix users

(Berlin, October 2010) ThinPrint, the leading provider of cloud printing solutions and longtime Citrix Ready® Partner, unveils at Citrix Synergy™ Berlin a preview of its technology that allows Citrix Receiver™ users to print directly from the iPad via Wi-Fi. The technology also supports iPhone, Android and BlackBerry® smartphones.

ThinPrint's cloud printing solution is based on the next generation of .print V-Layer™. This technology is a component of ThinPrint .print, the market-leading printing solution already used by over 8,000 Citrix customers worldwide. The solution allows Citrix Receiver for iPad users direct access to ThinPrint cloud printing technology which enables iPad printing from the Citrix session with any available printer in the same Wi-Fi network, for example at the office, when visiting a client, or in a hotel.

The .print version connecting the Citrix session with the cloud printing service is expected early 2011. Today, interested users can take advantage of ThinPrint's free Cortado Workplace app to experience how easy it is to print documents from mobile devices with cloud printing. [Cortado Corporate Server](#) offers enterprises a corresponding solution for the private cloud.

Cortado Workplace can be downloaded from www.cortado.com/workplace or the Apple, Android or BlackBerry app stores respectively.

“We offer a true hybrid cloud printing solution for all Citrix users, regardless of whether they are moving in a private or public cloud. With our solutions, users can spontaneously print from their session while mobile, whether they are at the office, at home or even in a hotel”, said Charlotte Künzell, board member at ThinPrint AG.

ThinPrint AG

ThinPrint specializes in mobile enterprise solutions and printing in distributed network architectures. The company's success is based on its print management solution, ThinPrint .print, which is successfully employed in companies of all sizes in all sectors around the globe. More than 500 major distributors and resellers in over 80 countries sell products made by ThinPrint AG. Thanks to numerous partnerships, client components using patent-pending .print technology have been integrated into the terminals, print boxes, PDAs and mobile phones of several leading hardware producers. Strategic partnerships with ThinPrint play a special role in this endeavor, including BlackBerry (RIM), Bluetooth SIG, Citrix Systems, Fujitsu Siemens Computers, Lexmark International, Microsoft, Nokia, Orange, Palm, Sun Microsystems, Symbian and VMware.
