

Optimized Printing for Windows Server 2008

The print management solution ThinPrint .print improves printing processes in environments with the newest Microsoft operating system

(Berlin, February 2009) The print management expert and Microsoft Gold Certified Partner ThinPrint now offers its solution ThinPrint .print in a version for Windows Server 2008. The proven features of the world-reknowned print solution can now also be used by companies that have already switched their IT to the newest Microsoft operating system

Primarily companies with a WAN structure and a heterogeneous printer landscape require a professional solution that optimizes their print environment, reduces the load on the network, and simplifies the system administration. ThinPrint now offers companies with Windows Server 2008 two different product versions for optimized printing: The .print Application Server Engine can be used on application servers. The .print Server Engine is available for use on print servers.

"This release now allows companies with Windows Server 2008 to improve their printing processes and lower costs", says ThinPrint Manager Charlotte Künzell. "Our DRIVER FREE PRINTING technology also allows 32-bit printers to continue being used in environments with 64-bit platforms, rather than having to throw them on the junk pile. A significant cost factor for many companies."

The solution is available at more than 500 resellers and distributors worldwide.

A free 30-day demo version can be downloaded at the company's website: www.thinprint.com/demo

ThinPrint

ThinPrint specializes in optimized print data transmission for distributed networks. ThinPrint's .print technology has established itself as the technological leader in print management software, and is used today in companies of every industry and size in all regions of the world. The application spectrum of the .print technology is widely diversified and provides highly efficient print management in, among others, Terminal Services environments, client/server architectures, SAP environments, web and mobile applications, with Host Printing, and in virtualized server or desktop environments. An extensive sales network with more than 500 qualified distributors and resellers in over 80 countries ensures optimal customer service on location. Additionally, 120 ThinPrint employees at headquarters in Berlin (Germany) as well as at the branch offices in Denver, Colorado (USA); Cleveland, Ohio (USA); and Sydney (Australia) provide for continuous growth. Strategic and OEM partnerships with leading global hardware and software manufacturers allow the ThinPrint .print technology to be used like no other print management solution – in practically every distributed network environment – with printers, print boxes, and thin clients. ThinPrint's .print technology is compatible with devices from manufacturers such as Hewlett-Packard, Lexmark, Kycera-Mita, Ricoh, SEH, Igel, Wyse, and many more. The most important strategic partnerships with companies include Citrix, Juniper Networks, Microsoft, and VMware. Citrix®, Citrix XenApp™ and Citrix Desktop™ are trademarks of Citrix Systems, Inc. and/or one or more of its subsidiaries, and may be registered in the U.S. Patent and Trademark Office and in other countries.
