Bluetooth Print Solution for BlackBerry Available for Download

Mobile Phones | Just Announced
Fri 28 Oct 2005

BERLIN, October 27 -- Owners of [Bluetooth](#) capable [BlackBerry handhelds](#) from Research In Motion (RIM) (Nasdaq: RIMM) can now download a print function for their device. Content [Beamer](#) Local for BlackBerry from the mobile [printing](#) experts at ThinPrint can be downloaded at www.content-beamer.com/local. With the solution from the BlackBerry Alliance Partner, Bluetooth capable BlackBerry handhelds can print [email](#) texts, calendar entries, contact data, tasks, and memos via Bluetooth. When downloaded, the command for Bluetooth printing is automatically integrated directly into the BlackBerry menu. Content Beamer Local for BlackBerry has a one-time cost of 29 euros including tax. The version provided for download includes a free trial period.

"Content Beamer Local for BlackBerry is the world's first Bluetooth print solution for the individual BlackBerry user," states Carsten Mickleit, ThinPrint Managing Director. "The product is therefore an ideal extension of our server solution, Content Beamer for BlackBerry, which is geared toward enterprise customers and also enables Bluetooth printout of attachments in original format as well as addressing network printers."
