

Additional ThinPrint License Terms (ALT)

applicable to any "Annual License" of any ThinPrint Software Product

Important!

Please read the following Additional License Terms that are supplemental to the EULA of the respective Software Product which hereby are included by reference into these ALT. Upon installation, copying or any other use of the Software you declare your consent with the conditions of these ALT and agree to comply with them. If you install the Software as an administrator or other member of staff of a company entitled to installations and/or if you make the Software available to users after installation, you also declare your consent with the conditions of these ALT and agree to comply with them.

If you, however, do not agree with the conditions of these ALT, you are not entitled to install, make available and/or use the Software.

1. General

These ALT apply to any and all software licenses which have been acquired by the End User as a so-called "Annual License". ThinPrint offers most of its Software Products for licensing based on the Annual License model. ThinPrint reserves the right to determine from time to time at its discretion which Software Products are offered as part of its Annual License. The current list of Software Products available as part of the Annual License can be viewed in the User Portal at ThinPrint's website (credentials required) or may be viewed at ThinPrint's website where the individual product description indicate the product's availability as an "Annual License".

2. Annual License

- 2.1 An Annual License is provided on a "per user per year" basis. Per Named User one Annual License must be installed. Any and all Software Products that have been elected at ThinPrint's discretion to be part of the Annual License may be used/deployed by the licensed Named User for the term of the license.
- 2.2 An Annual License may NOT be combined with any other licensing model (server-based or user-based licensing) offered by ThinPrint currently, in the past or in the future, if the basic ThinPrint products (ThinPrint Server Engine, ThinPrint Application Server Engine) are deployed according to the server-based or user-based license model. This limitation does not apply, if the End User purchases ThinPrint Software licensed according to different licensing models and restricts deployment of the differently licensed component strictly to independent IT environments. However, the End User is specifically entitled to purchase the "ThinPrint Host Integration Service" and use it in addition to the Annual License.
- 2.3 User may purchase any number of Named User Annual Licenses. Annual Licenses are delivered in several pre-defined Named User packs. Annual License may only be used for the maximum number of Named Users as defined in the respective license key.
- 2.4 Annual Licenses are valid for a period of 12 (twelve) consecutive months and must be activated by ThinPrint after the first 30 (thirty) days of use according to the EULA of the respective Software Product. If User does not extend the term of the Annual License after expiry of the first 12 consecutive months, User must provide a so-called "Letter of Destruction" and, if applicable, provide the Removal Codes which are automatically created by the License Manager upon deletion upon ThinPrint's request.
- 2.5 Multiple activations of the Annual License keys are permitted, if User uses Clusters or Load Balancing or for back-up purposes (Disaster Recovery).
- 2.6 **The "Annual Licenses" are no subscription, e.g. an Annual License expires automatically at the end of its term and must be explicitly extended by the End User, if he/she decides to keep his/her Annual License.**

3. Software Components

For the Annual License, it is mandatory for the User to use either an “Application Server Pack” or a “Print Server Pack” basic component. User may optionally retrieve other components that are offered by ThinPrint as part of the Annual License.

4. Miscellaneous

- 4.1 In case of discrepancies between these ALT and the EULA, the provisions of these ALT prevail.
- 4.2 Notwithstanding the above, the EULA of the respective Software Product remains in full force and effect.
