ThinPrint Unveils Print Solution for Windows Virtual Desktop

ThinPrint's ezeep product will fully meet the requirements for Windows Virtual Desktop and enable a secure and easy connection to existing print infrastructure.

(BERLIN/DENVER, May 9, 2019) – ThinPrint, provider of the world's leading print management software, and a selected launch partner for Windows Virtual Desktop, is announcing the details of its print solution designed specifically for Windows 10 multi-session desktops hosted on Azure.

At the Ignite Tour in Amsterdam, Microsoft launched the much-anticipated public preview of Windows Virtual Desktop – its comprehensive service for cloud-based desktop and app virtualization. General availability is currently expected for July. Windows 10 multi-user is optimized for Office 365 and will be offered exclusively via the Azure Cloud. A secure and easy-to-use service that perfectly integrates with Windows Virtual Desktops is essential to enable users to connect their local printers with Windows Virtual Desktop, support printing for mobile and home office employees as well as manage print environments and policies.

"The Azure Cloud offers companies many advantages, especially in terms of scaling their environment. We decided to build our Windows Virtual Desktop printing solution based on our proven ezeep cloud printing product – enhanced with two decades of proven ThinPrint technology" said Charlotte Künzell, CEO of ThinPrint. "Customers can easily manage their printing processes, without having to worry about the security of their print jobs, high availability, printer drivers or the day-to-day operation of print servers."

To achieve this, ThinPrint will soon offer a version of ezeep, fully optimized for printing Windows Virtual Desktop. This can be simply installed via the Azure Marketplace and is immediately available to the entire organization thanks to the seamless integration with Azure Active Directory. The printers are connected via the ezeep Connector and network printers can be quickly and easily integrated with the ezeep Hub. The solution establishes a secure connection to its print service without the need for a VPN. Administrators can centrally manage print settings via a clear web console with users having the option to make specific settings via an intuitive self-service portal.

"After ezeep's quick setup, users have secure access to all their printers at any time, regardless of the end device and whether they are network printers in the company or local printers in the home office," said Christoph Hammer, Senior Vice President of Cloud Services at ThinPrint. "The design, which is harmonized with Windows Virtual Desktop, ensures a perfect user experience."

Interested customers can now register here for the preview:

About ThinPrint

ThinPrint, with nearly 20 years of continuous development and internationally patented ThinPrint technology, is the leading provider of print management software and services for businesses. In 2015, ThinPrint acquired ezeep, including its native cloud printing technology, which has since become the leading printing solution for coworking and shared workspaces. With these two strong product lines, ThinPrint delivers a unique printing experience for every modern workplace. Whether printing from traditional PCs, mobile devices, thin clients, virtual desktops, or from the cloud, over 25,000 companies across all industries and of all sizes optimize their printing infrastructure and increase productivity thanks to ThinPrint. In addition, more than 100, and growing, Desktop-as-a-Service, and Software-as-a-Service providers deliver reliable, high-performance printing from the cloud to their customers. Investment in ThinPrint printing solutions leads to a fast ROI because the easy-to-implement and manage print systems reduce the burden on IT departments, result in significant performance improvements while ensuring optimal, reliable print support at every workplace. ThinPrint's technologies and components enable its use in almost any infrastructure and take into account integration of branch and home offices as well as mobile employees. The solutions are developed and rigorously tested at ThinPrint's headquarters in Berlin – software Made in Germany. Offices in the United States, the UK, Australia, Japan and China, as well as more than 350 channel partners around the world offer direct and on-site customer care. Thanks to numerous OEM partnerships, ThinPrint technology components are integrated in a variety of printers and thin clients from leading hardware manufacturers. Special significance is placed on the strategic partnerships of the company with Brother, Citrix Systems, Fujitsu, Fuji Xerox, Hewlett-Packard, IGEL, Konica Minolta, Kyocera Mita, Lexmark, Microsoft, MobileIron OKI, Parallels, T-Systems, VMware, Wyse Technology, Xerox and 10Zig.
