SKOK Arka

- **Task:** SKOK ARKA is one of the fastest growing mutual savings institutes in Poland with 26 branch offices throughout the country. Employees printing in Citrix environments often suffered from bandwidth constraints, losses in performance, and network instability. Managing the printers also took substantial time and effort.

- **Solution:** ThinPrint Engine provides system stability, reduces bandwidth needs, and makes printing fast even in the branch offices. Printer management is also faster and easier.

- **Quote:** "For our individual departments, efficient printing is just as an important requirement as the stability and performance of our entire IT environment. Using the ThinPrint solution has given us the ability to significantly increase the efficiency of our entire infrastructure." *Dariusz Stachera, IT Manager, SKOK ARKA*
